

**Walmart Statement Regarding Ongoing Consideration of Tax Reform in the U.S. House and Senate:**

“We support ongoing consideration of tax reform legislation in the House and Senate. The proposals under discussion could provide meaningful tax relief to a number of American families as soon as next year, many of whom shop in our stores and online with us every week. In addition, the proposals include important provisions to encourage investment in the United States and make U.S. businesses more competitive around the world. We appreciate the opportunity to be part of the ongoing dialogue on tax reform in Washington.”
